Governor Gray Davis  
State Capitol  
Sacramento, CA 95814.

Friday, June 25, 1999

Dear Governor Davis:

*Shaping the Future of California's Water*

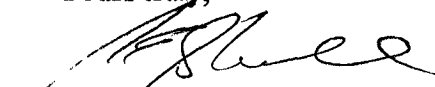

I care about the health of California's rivers, bays, and drinking water. The reason is that I care about the health of myself, my family, and my community.

You are presented with an opportunity to ensure the future of California's water, but your efforts to see that the CALFED program:

1. puts efficiency first, and puts new dams and reservoirs last
2. restores our rivers, bays and fish populations
3. improves water quality by enforcing pollution limits that are already law
4. save money by eliminating studies for new dams and reservoirs (see #1 above)

Thank you for making your best effort to make California a great place to live.

Yours truly,

  
Russell E. Blalack
